

Environmental Policy

At Sensorbee, we work to protect the environment and improve how we operate. We comply with the ISO 14001:2015 requirements and keep making our systems better to match our company's needs and the environment around us.

All employees of Sensorbee are acting to protect the environment by adhering to the following principles:

- We design our products to have a low impact on the environment.
- We help each other understand how to handle electronic parts, batteries in an environmentally responsible way.
- We comply with all environmental laws and regulations related to our products and operations.
- We're always working to improve how we manage, reduce, and safely dispose of hazardous waste.
- We look for ways to improve our environmental impact during product development and day-to-day operations.
